Computer Science graduate with hands-on project experience developing React applications and responsive web interfaces. Familiar with React Hooks, Context API, client-side form validation, and component-based UI development.

EDUCATION

B.S. in Computer Science, California State University, Fullerton

May 2026 | GPA: 3.94/4.00 | Summa Cum Laude

TECHNICAL SKILLS

- **Languages:** JavaScript, HTML, CSS, C++, PHP, SQL
- **Frameworks/Libraries:** React, React Bootstrap, Styled Components
- **Tools/Technologies:** Git, GitHub
- **Frontend Concepts:** React Hooks, Context API, React Router, Responsive Design, Controlled Components, Form Validation

PROJECTS

Cafeteria Ordering System | *React* | Spring 2025
GitHub: https://github.com/HunterTran10/CPSC-362-Cafeteria-Ordering-System

- Developed a React checkout interface with cart quantity controls and dynamically calculated order totals using Context API and Array.reduce.
- Implemented controlled delivery and payment form inputs with client-side validation for required fields, ZIP codes, card numbers, expiration dates, and CVV.
- Created reusable styled components using Styled Components and integrated React Router navigation between menu and checkout pages.

Personal Portfolio Site | *React, React-Bootstrap, CSS* | Spring 2026
GitHub: https://github.com/HunterTran10/Website-Portfolio | Live: https://huntertran.vercel.app

- Developed a responsive personal portfolio using React, React Bootstrap, and custom CSS, organizing content into reusable components.
- Implemented scroll-responsive navigation using React Hooks and window event listeners to dynamically update navbar styling.
- Created an interactive project gallery with clickable screenshots and a state-controlled lightbox modal.

Soccer League Management System | *PHP, MySQL, HTML, CSS* | Spring 2025
GitHub: https://github.com/HunterTran10/Soccer-League-Management-System

- Developed a PHP password reset form with server-side email validation and conditional error and success messages.
- Used MySQL prepared statements to retrieve user accounts by email and update password records.
- Implemented output escaping with htmlspecialchars() and styled a responsive password reset interface using HTML and CSS.
