Computer Science graduate focusing on frontend development with experience building React applications, including cart and checkout flows, form validation, and reusable React components.

EDUCATION

B.S. in Computer Science, California State University, Fullerton

May 2026 | GPA: 3.94/4.00 | Summa Cum Laude

TECHNICAL SKILLS

- **Languages:** JavaScript, HTML, CSS, C++, SQL
- **Frameworks/Tools:** React, Git
- **Concepts:** Responsive Design, UI/UX

PROJECTS

Cafeteria Ordering System | *React, Node.js, Express, MongoDB* | Spring 2025
GitHub: https://github.com/HunterTran10/CPSC-362-Cafeteria-Ordering-System

- Built a React checkout flow with cart quantity controls and live price totals calculated via Array.reduce over cart state from Context API
- Implemented form validation across delivery and payment fields using regex checks for ZIP code, expiration date, and card number, with controlled inputs and validation feedback through alert popups
- Integrated React Router navigation between checkout and menu states
- Rendered an empty cart message when no items were present, and redirected users to the home page after order confirmation using React Router

Soccer League Management System | *PHP, MySQL, HTML, CSS* | Spring 2025
GitHub: https://github.com/HunterTran10/Soccer-League-Management-System

- Built a password reset UI with conditional rendering for error, success, and form states using PHP template logic
- Implemented email validation on the server with inline error and success messaging and safe output escaping to prevent XSS (htmlspecialchars)
- Designed a responsive, centered form layout with custom CSS for inputs, buttons, and styling that reflects error or success state

Portfolio Site | *React, React-Bootstrap, CSS* | Spring 2026
GitHub: https://github.com/HunterTran10/Website-Portfolio | Live: https://huntertran.vercel.app

- Built a personal portfolio site using React and React Bootstrap, split into reusable NavBar, Banner, Skills, and Projects components
- Implemented navbar behavior that responds to scroll position, using useEffect/useState to track scroll position and dynamically update styling
- Built a lightbox modal for project screenshots using conditional state rendering, with a click that enlarges the image
